

# Software Requirements

You must meet these requirements to successfully complete the installation.

## Product Version

**AEM 6.0.0.SP3, 6.1.0.SP2, 6.2.0, 6.3.0, 6.4.0, 6.5.0**  
**GlobalLink Project Director 4.18.0 or later**

# Installation Prerequisites

You must meet these installation prerequisites before installing the Adaptor:

1. Log in with system administrator privileges
2. Have the AEM adaptor package ready to install
3. Create a language copy of the master site in AEM for each required language

# Install the Adaptor Package

Before installing the GlobalLink AEM adaptor package on your AEM instance, verify that you meet the prerequisites. Refer to Software Requirements.

To install the adaptor package:

1. From the AEM dashboard, go to Tools > Deployment > Package Share.
2. On the CRX Package Manager tab, click Upload Package.
3. On the Upload Package dialog, browse to and select the GlobalLink-Connect-  
<version\_number>.zip file. The GlobalLink package is listed as a package available for installation.
4. Select the GlobalLink package and click Install.
5. On the **Install Package** dialog, accept the default **Advanced Settings**.
6. Click **Install**.

The adaptor package is installed. The **Activity Log** is updated to reflect the completion status and **GlobalLink Translation** is available in the **Navigation** page.
