

Configuration of MiaProva

Setup new API integration on Adobe IO console (to be performed by MiaProva test manager/Admin and someone with **Administrative Access** to Adobe Experience Cloud)

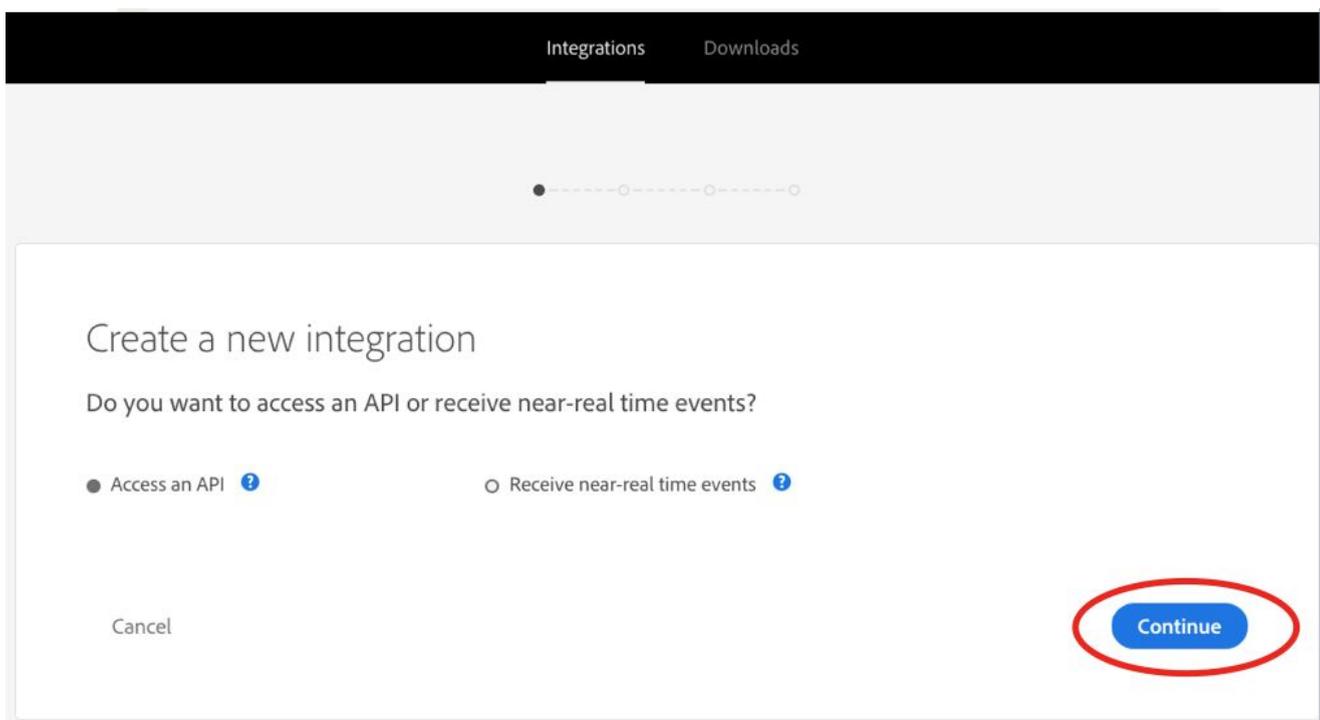

1. Login to MiaProva with your test manager account and download the public certificate from the "Tests Setup" tab of the "Admin Console" page (Admin Console available via the gear icon on the top of the page).

The screenshot displays the 'ADMIN CONSOLE' interface for MiaProva. The 'TESTS SETUP' tab is active, showing the 'API Configuration' section. Fields include: Adobe Target Tenant (demystified), Adobe API Key (redacted), Adobe Client Secret (redacted), Adobe Technical Account ID (redacted@techacct.adobe.com), Adobe Organization ID (redacted@AdobeOrg), Adobe Target Requests Limit (10000), and Adobe Target Requests Limit Interval (hours) (24). A red arrow points to a 'Public Certificate' section with a 'Download' button.

2. Login to <https://console.adobe.io/> - you will be prompted to log into the Adobe Marketing Cloud at this point if you were not already logged in.
3. Either create a new integration or edit an existing one. To create a new integration, click the "New

4. On the new integration screen, select "Access an API" and click "continue" button.

5. When asked to select the Adobe service you wish to integrate with, select "Adobe Target" under "Experience Cloud" column and click "continue" again.

Create a new integration

Select the Adobe service you wish to integrate with.

7. On the “Integration Details” screen, enter an integration Name and Description and select the Public Certificate for your tenant (downloaded on step 1). When done, click the “Create Integration” button:

The screenshot shows a web interface for creating a new integration. At the top, there are tabs for 'Integrations' and 'Downloads'. Below the tabs is a progress indicator with four dots, the second of which is filled. The main content area is titled 'Create a new integration' and 'Integration Details'. It contains three input fields: 'Name' with a placeholder 'Provide a unique and descriptive name for the integration' and a character limit of '6 to 25 characters'; 'Description' with a placeholder 'Provide a short description of the integration' and a character limit of '6 to 1000 characters'; and 'Public keys certificates' with a help icon. Below these fields is a dashed box for file upload, containing icons for a PDF, a document, and a chart, with the text 'Drag and drop your file or Select a File from your computer'. Below the dashed box, it says 'You can add 1 more file(s)'. At the bottom left is a 'Cancel' button, and at the bottom right is a 'Create integration' button.

8. On the Integration created page, click on the “Continue to integration details” button.

The screenshot shows a confirmation page titled 'Integration created'. At the top left is an 'I/O' logo, and at the top right is a user profile icon. Below the logo is a progress indicator with four dots, the second of which is filled. The main content area is titled 'Integration created' and contains a green-bordered box with the following text: 'Your Integration has been created .', 'Now you're ready to view the Integration Overview, where you can manage your Integration, view Insights and more. Here are some other resources to help you get started:', and a bulleted list with 'Documentation' and 'Support'. Below the list is a blue button labeled 'Continue to Integration details'. At the bottom of the page, there are links for 'Terms of use', 'Privacy policy', 'Cookies', and 'Support', followed by the copyright notice '© Adobe Systems Incorporated. All rights reserved.'

9. From the integration details page copy the relevant information into the corresponding fields of the “Tests Setup” tab of MiaProva’s “Admin Console” page and click the “save” button. The Adobe Target Tenant field will be the subdomain of the URL that you use to access Adobe Target. For example, here at Demystified we access Adobe Target at this URL: <https://demystified.marketing.adobe.com>. Our Adobe Target Tenant is: demystified

10. At this point, expect to wait up to 24 hours to see any Adobe Target data. The data often appears sooner but is dependent on how many tests you have in your account. At this point, continue to the steps below to enable user specific access to your Adobe Target and Adobe Analytics account.

Creation of MiaProva user access for Adobe Target and Adobe Analytics (if applicable and not required unless you use A4T).

1. Visit the Admin console of the Experience Marketing Cloud here (must have Admin rights): <https://adminconsole.adobe.com>

2. Click on “Add User to Organization” as seen here:

2. MiaProva will supply you with an email login ID that will be specific to your MiaProva account. This email will match your tenant ID within MiaProva. For example, if your login URL to MiaProva is <https://companyX.miaprova.com>, your email will be companyX@miaprova.com.

3. Add this email address as a User to your Organization:

Add a User

User Details

Assign Products

Assign User Groups

Enter user's email address

companyX@miaprova.com

First Name (optional)

Last Name (optional)

3. Add Adobe Target and Adobe Analytics to this user under the Assign Products section.
4. Notify support@miaprova.com that the user access has been setup for Adobe Target and Adobe Analytics (if applicable).
5. You are all set! Sit back and enjoy some of our videos: <http://bhawk.me/miaprovaideos> while we get everything all setup for you.

Thank you! If you have any questions at all, please email support@miaprova.com or visit the feedback links anywhere within the MiaProva application.
