AEM Connector Installation Procedures

CONFIDENTIAL AND PROPRIETARY - NOT FOR DISTRIBUTION

A silhouette of a three-masted sailing ship is centered against a dark, cloudy sky. The ship's masts, rigging, and horizontal spars are clearly visible. A white rectangular box is superimposed over the center of the image, containing the text 'ABOUT BUREAU WORKS' in white, bold, uppercase letters.

**ABOUT BUREAU
WORKS**

About

Bureau Works is a modern TMS (Translation Management System) that allows you to have full visibility and control of your translation projects. With the AEM Connector for Translation Framework, you can create your translations projects right in your AEM interface.

Bureau provides full access to dashboards with Quality reviews, style guides, term base management among other features exclusive to Bureau Works users.

To learn more, please visit <https://bureau.works>

Step One

Fill in the form available at <https://bureautranslations.com/aem>

Once you are all set up in Bureau Works, we will send you and your IT Team a Package compatible with AEM Translation Framework

AEM CONNECTOR

FEATURES OVERVIEW

Our AEM Connector allows you to directly bridge your translation projects to Bureau Works, our Translation Management System.

Multiple Projects

You can manage multiple projects, and with multiple configurations. Each project allows the creation of multiple translation jobs and tasks.

Job Status

The AEM Connector for Translation gives full visibility of a job status. We've integrated the Scoping in AEM to our quoting mechanism, where you can check in real time the costs associated with your project.

QA Dashboard

All Jobs reviewed by Bureau are available to our clients in our Quality Module Dashboard. You can have access to statistics and detailed review data from your projects created in AEM.

Step Two

In your AEM instance, select the "Tools" menu, then "Deployment". Select "Packages", this will open the **CRX Package Manager**.

Packages
Manage installed packages and applications

The screenshot displays the CRX Package Manager interface. The left sidebar contains navigation options: "Reset", "Sort by" (Last used, Name, Last modified, Installation date, Recently added), "Show" (All packages, New packages, Installed/Built), and "Groups" (All packages (164), my_packages, Adobe (70), aem-connector, com (6), com.adobe.ec (2), com.adobe.ec.inbox (1), day (85), fd, mobileapp, rep.policy, sling). The main content area shows a list of installed packages with columns for package name, version, last installed date, and administrator. Each package entry includes a "Share" button and a size indicator.

Package Name	Version	Last installed	Admin	Size
we.retail.community.apps-1.11.66.zip	1.11.66	Feb 27	admin	19.3 KB
cq-social-content-fragments-pkg-1.0.6.zip	1.0.6	Feb 27	admin	14.7 KB
we.retail.community.enablement.common-1.11.66.zip	1.11.66	Feb 27	admin	6.5 MB
we.retail.community.enablement.author-1.11.66.zip	1.11.66	Feb 27	admin	63.1 KB
we.retail.community.content-1.11.66.zip	1.11.66	Feb 27	admin	963.8 KB
we.retail.client.app.ui.content-1.0.30.zip	1.0.30	Feb 27	admin	205.3 KB
we.retail.client.app.ui.apps-1.0.54.zip	1.0.54	Feb 27	admin	4.2 MB

Step Three

Click in "Upload Package" and select the ZIP file that was provided to you by the Bureau Team. The package is a ZIP file with the code necessary to allow for your Translation projects to be created and executed in Bureau Works. The Bureau Works AEM Connector will be displayed in the package list.

A dialog box titled "Upload Package" with a close button (X) in the top right corner. It contains a text input field labeled "Package:" with the value "aem-connector.ui.apps-6.3.0.1-SNAPSHOT.zip" and a "Browse..." button to its right. Below this is a "Force Upload:" section with an unchecked checkbox and the text "Check to overwrite existing packages." At the bottom are "OK" and "Cancel" buttons.

A screenshot of the package list interface, showing a list of installed packages. The top navigation bar is identical to the one in the previous image. The list contains the following packages:

Package Name	Version	Last Built / Installed	Author	Actions	Size
aem-connector.ui.apps-6.3.0.1-SNAPSHOT.zip	6.3.0.1-SNAPSHOT	Last built 17:18	hcabral	Install	1.7 MB
we.retail.community.apps-1.11.66.zip	1.11.66	Last installed Feb 27	admin	Share	19.3 KB
we.retail.community.enablement.common-1.11.66.zip	1.11.66	Last installed Feb 27	admin	Share	6.5 MB
we.retail.community.enablement.author-1.11.66.zip	1.11.66	Last installed Feb 27	admin	Share	63.1 KB
we.retail.community.content-1.11.66.zip	1.11.66	Last installed Feb 27	admin	Share	963.8 KB

Step Four

Click "Install", which will trigger the actual installation procedure. In the "Install Package" dialog there are some advanced settings that are not necessary for a default installation. After a successful installation, the listing is update with a green marker - which means that the connector is ready to be used!

Step Five

Visit <https://bureau.works> and login with your account (you must be our client in order to perform this step). Visit your "My Account" page and get your API key and secret. NOTE: if you already have created an API key, please refer to your stored values if they are used somewhere. The action of showing your API key and secret will reset both values. Take note of these values, once you close the dialog, you can no longer recover the same values.

SHOW MY BUREAU WORKS API TOKEN

ATTENTION

Your API key will be displayed only ONCE! If you created a key before, this will REPLACE that key with a new one if you confirm this action. Are you sure that you want to proceed?

NO

YES

API Key

Please Copy your API ID and Key NOW! You will not be able to retrieve it later, only reset it.

ID

OK

Step Six

With the Bureau Works API key at hand, you may now create your Translation Configuration. Select the "Tools" menu, then "Cloud Services". In the list, you will find the Bureau Works Connector which you just installed. Click in "Configure Now" and a dialog will display. Here we give the Configuration Name "Bureau Works" and then click on "Create". Another dialog will be displayed, where you will enter your API details, and choose **XML as Export Format**.

Cloud Services
Connect to Adobe Marketing Cloud

Bureau Works Connector

Bureau Works AEM Connector allows site administrators and agencies to access our efficient, World-class Translation Management System.

[Learn more](#) [Configure now](#)

Step Six - Continued

Here we give the Configuration Name "Bureau Works" and then click on "Create". Another dialog will be displayed, where you will enter your API details, and choose **XML as Export Format**. If you entered the data correctly, a message will be displayed with "Verification passed", and your configuration is ready to use!

The "Create Configuration" dialog box has a "Title*" field containing "Bureau Works" and an empty "Name" field. Below is a preview area with a red brick icon and the text "Bureau Works Connector Configuration Settings for Bureau Works Connector". At the bottom are "Create" and "Cancel" buttons.

The "Edit Component" dialog box is titled "Bureau Works Connector Settings". It contains fields for "Bureau Works URL*" (https://bureau.works), "API ID*" (redacted), "API Key*" (redacted), and "Export format" (XML). A "Test configuration" button is located below the "Export format" field. "OK" and "Cancel" buttons are at the bottom.

Step Seven

You can now create your Translation Projects and select the Bureau Works AEM Connector as your Translation Provider, when selecting Human Translation. In AEM 6.3, each project must have only one target language, but this changed in AEM 6.4. For full Translation Project management reference, please visit <https://helpx.adobe.com/experience-manager/6-3/sites/administering/using/tc-manage.html#PerformingInitialTranslationsandUpdatingExistingTranslations>
