

# Adobe Creative Cloud

+ ADD APPLICATION

## INFORMATION

All in one place. Creative Cloud includes the entire collection of creative apps for desktop, from favorites like Adobe Photoshop and Illustrator to new tools like Adobe Experience Design CC (Preview). Plus, great mobile apps to create whatever you want, wherever you are.

## CONFIGURE ADOBE CREATIVE CLOUD

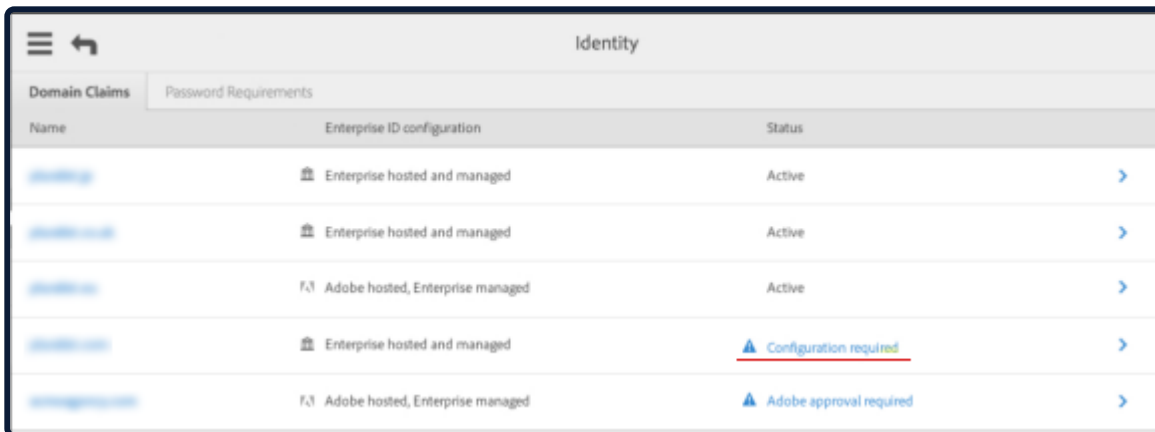

---

Note: You first have to add the application by clicking on the blue "+ADD APPLICATION" button in the top right corner before the steps below. But please read the instructions and steps before you add the application.

---

### STEP 1

Please Click on "Configuration required" to open the domain details page.

Identity		
Domain Claims	Password Requirements	
Name	Enterprise ID configuration	Status
<a href="#">example.com</a>	🏢 Enterprise hosted and managed	Active >
<a href="#">example.com</a>	🏢 Enterprise hosted and managed	Active >
<a href="#">example.com</a>	🏢 Adobe hosted, Enterprise managed	Active >
<a href="#">example.com</a>	🏢 Enterprise hosted and managed	<span style="color: red;">⚠️ Configuration required</span> >
<a href="#">example.com</a>	🏢 Adobe hosted, Enterprise managed	<span style="color: blue;">⚠️ Adobe approval required</span> >

### STEP 2

Do the following:

- Download this IDP certificate: This will be generated & provided after this application is added. (<span class='sp-info-holder'>This will be generated & provided after this application is added.</span>)
- This certificate is in PEM (base-64 encoded X.509) format. Save it as .cer file extension (not .pem or .cert).
- For IDP Issuer enter: This will be generated & provided after this application is added.
- For IDP Login URL enter: This will be generated & provided after this application is added.
- For IDP Binding choose HTTP - POST
- For User Login Settings choose Email Address

- Click on "Save"

---

### STEP 3

Click on "Activate Federated ID". In case you need to modify SAML settings, click on "Edit Configuration".

---

### STEP 4

After finishing with configuring you need to assign the correct user group in your Adobe Creative Cloud Application in your SAASPASS Account.

## PORTS USED BY SAASPASS PRODUCTS

---

The following outlines the TCP and UDP ports used by SAASPASS products.

Your network administrator may need this information to make sure your computer or device can connect to services, automatic software updates and the Online portal.

Network administrators may also use port-watching software in addition to the information below when deciding how to set up firewalls or other access control schemes.

- 443 TCP - www.saaspass.com - Secure Sockets Layer (SSL, or 'HTTPS') TLS Online Portal, Barcode Instant Login , Proximity
- 5222 TCP - xmpp.saaspass.com - XMPP client connections Mobile App , Computer Connector
